

Please do not rescind the rights of citizens to uphold their religious beliefs. Many religious leaders are not aware of what is in the inoculations besides the disease it is trying to prevent. They are not aware that formaldehyde, aluminum and thimerisal (which is 80% mercury) is in the formulas. Orthodox Jews do not even embalm dead bodies with formaldehyde. There is pig tissue in some shots. A Moslem woman passed out after learning her daughter's shot had pig in it, meaning she would not be able to enter heaven. Clergy do not know that HEK293 is kidney cells from aborted humans that are included in shots. Senomyx, the company that provides these cells claim they are cloned from a male baby aborted in the 1980's. Explain that to clergy and see how many have no problem with it.
